**DETAILED ACTION**

1. This is a response to the Appeal Brief, filed 10/8/09.
2. Claims 1,2,5-9,12-16,18-22 are pending.

***Response to Arguments***

3. Claims 1,2,5-9,12-16,21,22 were previously rejected (2/9/09). Claims 18-20 were allowed (2/9/09).
4. Applicant appealed the rejection of claims 1,2,5-9,12-16. Claims 21-22 are not appealed. Their rejections are maintained.
5. The following responses are answers to the arguments brought up the Appeal Brief (10/8/09):
6. As to independent claims 1,8 Applicant argues "Kudo does not describe "sequentially recording the data in a raw recording mode on the lead-in region, a program region, and a lead-out region" after building the TOC information on the data in the buffer, as in the claimed embodiment of the present application (page 15). After further consideration, the argument is persuasive. Kudo teaches concurrently generating the TOC as the data is recorded (0300). Thus, Kudo does not generate the TOC before recording the data to the disk, as claimed. Claims 1,2,5-9,12-16 are now allowable over Kudo.
7. In view of the consideration above, Applicant's request for reconsideration of the finality of the rejection of the last Office action is persuasive and, therefore, the finality of that action is withdrawn.

Art Unit: 2187

8. Applicant argues that one of ordinary skills would not have been motivated to modify Kudo to use Sub Q data of 16 bytes (page 16). This argument is not persuasive. By Applicant's own admission, the SubQ value can be 16 bytes or 96 bytes, dependent on the record data being used (specification, 0017). This shows that the SubQ value varies, depending on the type of data being recorded. In the embodiment of Kudo, the SubQ data is 96 bits (12 bytes), which satisfies Kudo's record data requirement. Since the SubQ value varies by the record data used, as indicated by Applicant's admission, one of ordinary skills would readily recognize the motivation to use different SubQ data size (such as 16 bytes), to satisfies the current data requirement of the record data.

9. Since claims 21-22 are non-contested/appealed and Applicant has requested their cancellation (4/6/09), they will be withdrawn from consideration and canceled by Examiner's Amendment to move the application to issue.

***Examiner's Amendment***

10. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows: Claims 13-14 have been amended to correct the dependency to claim 8 (apparatus), instead of claim 1 (method). Claims 21-22 are canceled as withdrawn claims that are non-contested/appealed.

**In the claims**

**Cancel** claims 21-22.

Art Unit: 2187

Claim 13. Replace "claim 1" with --claim 8--.

Claim 14. Replace "claim 1" with --claim 8--.

***Allowable Subject Matter***

11. Claims 1,2,5-9,12-16,18-20 are allowed.
12. Claims 18-20 are allowed for reasons indicated in the previous office action (2/9/09).
13. Claims 1,2,5-9,12-16 are allowable for reasons indicated above.
